

# Classics Data Visualization

## Learning Goals

- Understand their citations.
- Understand what kind of data visualizations they are interested in, or were not able to accomplish.
- Understand what kind of searches they are interested in.
- Understand how they work and what devices they use.

## General

Describe your typical day preparing for your thesis.

What devices do you use when studying?

How do you find your primary resources?

What are the most important tasks you or other people need to perform researching?

## Data

What websites do you use to find information?

Are there any challenges you face accessing information?

Is there anything you look for on websites that is missing or hard to find?

What resources do you use?

When doing searches what do you normally search for?

Was there some way you wanted to look at your data but were unable to do so?

## Sharing Information

Would you ever need to share these metrics with others?

If yes – who, what format and method of sharing?

Would you ever need to export the data?

If yes – when, why and in what format?

# Data Visualization

What resources did you use to create visuals?

What resources do you currently use for data visualization?

Would you benefit from seeing any of your data on a map?

Is there a kind of map or graph that you were unable to create?

# Outro

Could you send me a copy of your citations?

What haven't we asked you today that you think would be valuable for us to know?

Based on everything that I asked you. Let's say I'm going to build a solution for your problems and you had a magic wand, and you can get anything. What is your wish?
